SUMMARY

CSE graduate (CGPA 8.75) with hands-on experience in **full-stack development** and solid fundamentals in **Object Oriented Programming** and **Data Structures & Algorithms** . Built a 23-module multi-tenant SaaS platform at Progressive Novus using NestJS, Next.js, PostgreSQL, and Redis, and authored a peer-reviewed paper at IEEE INSTCon 2026. Looking to grow into an enterprise engineering environment .

EXPERIENCE

Software Developer Intern – Progressive Novus, Remote

Apr 2026 – Jun 2026

- Engineered **Dine&Stay OS**, a multi-tenant Restaurant POS and Hotel Management SaaS, using a Turborepo monorepo with NestJS, Next.js 14, PostgreSQL 16, Redis, and Socket.IO.
- Delivered a **23-module backend** covering GST-compliant billing, real-time KDS, hotel reservations, and inventory, isolating tenants via row-level scoping across a **36-table PostgreSQL schema** supporting .
- Streamlined real-time order sync through Socket.IO/Redis pub-sub.

Software Developer Intern – HYROFSY, Golaghat, Assam

Dec 2024 – Jan 2025

- Authored RESTful backend endpoints in Node.js and Express.js, adding validation pipelines that reduced **bad-request errors** .
- Tested backend APIs and integrated frontend components with backend services, debugging API and legacy logic issues while maintaining clean Git practices across multiple merged pull requests.

EDUCATION

Bachelor of Technology – Computer Science and Engineering

2022 – 2026

The Assam Kaziranga University, **CGPA: 8.75**

PROJECTS

Anusandhan Management System (AMS) — Node.js, React.js, MongoDB, FAISS, Qdrant

- Architected a research-intelligence platform featuring a semantic duplicate-detection engine built with Sentence Transformers (all-MiniLM-L6-v2), Qdrant, and FAISS.
- Implemented **RBAC** across scientist and administrator portals secured with stateless JWT authentication; deployed to production via **Vercel cloud hosting**.

ShapeIt – Real-Time 3D Generation — FastAPI, React.js, Three.js, Shap-E, TripoSR

- Developed the codebase underlying architecture recognized at **IEEE INSTCon 2026** (Paper ID: 1611), benchmarking TripoSR against a **Shap-E latent diffusion baseline** with a **2.59x** improvement in **mean inference latency**.
- Exposed generation pipelines as asynchronous **Python (FastAPI)** endpoints running on CPU infrastructure while routing GPU-intensive steps to remote cloud infrastructure.
- Built a React and Three.js canvas featuring real-time orbit controls, enabling hardware-accelerated 3D rendering and novel view synthesis.

TECHNICAL SKILLS

Programming	C++, JavaScript, Java
Backend & APIs	NestJS, Node.js, Express.js, FastAPI, REST Architecture
Databases	PostgreSQL (SQL, Relational), MongoDB (NoSQL), Redis (Caching), Qdrant (Vector DB)
Frontend	Next.js 14, React.js, Three.js, Tailwind CSS
AI/ML	Sentence Transformers, FAISS, Semantic Similarity, Vector Embeddings
Systems	System Design, Data Structures & Algorithms, Multi-tenancy, RBAC, JWT Auth, WebSockets, OOP
Tools	Git, GitHub, Docker, Postman, Turborepo Monorepos,

CERTIFICATIONS & ACHIEVEMENTS

- IEEE INSTCon 2026 Accepted Research Paper** (Organized by **NIT Rourkela**): Principal Author of “*Real-Time Interactive 3D Generation: A Lightweight Hybrid Multi-Model Framework*” – peer-reviewed and selected for the IEEE INSTCon 2026 conference proceedings (Paper ID: 1611).
- Contributed to **GirlScript Summer of Code (GSSOC) 2024** as an open-source contributor across multiple repo , fixing bugs and refactoring UI.
- Merged **50+ pull requests** across internships, group projects, and open-source repositories throughout academic career.
- Solved **305+ LeetCode problems** with strong foundations in **Data Structures & Algorithms** (Contest Rating: **1,403**).
